Nowdays , **Technology** has reached a very higher place. We are using technology everyday even a small work today are done by using Machine. We are surrounded by technology, Without technology we cannot live a single day. After waking up in the morning to going to bed we have used 100 of machine knowigly and unknowingly.

So, We can even use in for Education System. Some of the colleges have already started Online class. Through this the student can learn from anywhere at any time.

Some of the Appliction like zoom, google classroom, skype etc. By this appliction the teacher teaches their students.

After 10 years The way of teaching will be completely changed. Many students have not to leave the home to complete his/her graduation. Nowadays many have to move from home they have to leave their parents to complete their studies, because in their native place there in no good colleges or schools.

Even I have faced many problem because after my higher secoundary i have leaved my parents and I moved to Durgapur to complete my studies.

After 10 years no one have to go to schools and colleges they can learn from and they can spend plenty of times with their parents.

Everything we can understand from online, we will get online certificates. We can solve many problems as we can. By **virtual class** we can feel that we are in our class room and all the students are sitting next to me. All my friends will be there ,I can talk to them even they can talk to me.

We will feel we can directly talk to teacher and ask our doubt whatever we want to ask. Today **Youtube** is a great platform to learn anything anytime anywhere. Many Professor are already started studying on Youtube. They can earn money from there by their teching.If some topics we cannot understand by the professor then we can move to other Professor tutorials.We can also learn to solve the problem in different way.By Youtube we can enjoy our Learning.

I think our Future Education System will be very usefull and effective. Future Education System will be very good.
